

STRATEGIC VALUE

INVESTMENT MANAGER

Corbyn Investment Management, Inc.
Corbyn has provided separate account investment management services since 1973. Over the years, our mission has remained constant: Earn clients' trust by providing them with outstanding service while seeking strong, consistent investment results.

GOAL

The objective of this investment program is primarily capital appreciation with some income generation. To achieve this goal, equity and fixed income holdings will tend to be fewer, more concentrated positions compared to other Corbyn account types. This investment strategy may also experience a higher rate of turnover and on occasion we may invest a substantial portion of the account in "event-driven" equity or fixed income securities such as workouts and special situations.

EQUITY CHARACTERISTICS

Median Market Value (mm)	\$6,019

Performance data quoted represents past performance. Past performance does not guarantee future results. Current performance may be higher or lower than performance quoted. Please review the firm's ADV before investing. Investments in lower-rated and non-rated fixed income securities present a greater risk of loss to principal than higher-rated fixed income securities. All performance data reflects the reinvestment of interest and dividends, where applicable, and are net of management fees and based on time-weighted return. Multi-year periods are calculated by linking the annual rates of return within such periods. The performance shown is calculated each quarter by including all Corbyn-managed accounts employing the stated objective. A new account or an account that changes strategy is included in the composite at the beginning of the fifth full month under management. Any account considered non-discretionary is excluded from the composite. Prior to 10/1/17, a new account or an account that changed strategy was included in the composite at the beginning of the first full quarter under management. All investments involve risk and principal loss is possible. The "Benchmark" is comprised of 70% Russell 3000 Value Index / 20% ICE BAML 1-3yr BB Cash Pay High Yield Index / 10% ICE BAML 3-month T-Bill Index (rebalanced monthly). The Russell 3000 Value Index is composed of mid-capitalization U.S. equities that exhibit value characteristics such as lower price-to-book ratios and lower expected growth rates. ICE BAML 1-3 year BB Cash Pay High Yield Index is a subset of ICE BAML U.S. Cash Pay High Yield Index including all securities with a remaining term to final maturity less than 3 years and rated BB1 through BB3, inclusive. The ICE BAML U.S. 3-month T-Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. Index returns reflect the reinvestment of dividends and capital gains, if any, but do not reflect brokerage commissions or other expenses of investing. It is not possible to invest directly in an index. Corbyn's holdings and sector allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security. Fees on accounts: 0.70% of managed assets referred to Corbyn by a registered investment advisor. INVESTMENT THESIS

As investors, we focus on inefficiently-followed securities that we believe are undervalued and often possess company-specific catalysts for future appreciation. By carefully investigating these companies and understanding the motivations of the management teams, we attempt to identify attractive investments selling at discounts to the underlying value of their business models. At Corbyn, we have always sought to minimize portfolio volatility and preserve capital during times of market turmoil. We believe that this "protection of principal" mentality has proven effective during the highly volatile conditions of recent market cycles. Looking forward, we feel that our goals of providing steady, consistent performance will continue to differentiate our firm and make our investment programs particularly attractive.

CREDIT QUALITY DISTRIBUTION

All portfolio metrics are as of 9/30/2018.

This chart illustrates the annualized performance of a hypothetical \$500,000 investment in a Strategic Value account since 9/30/08, net of Corbyn management fees and based on a time weighted rate of return. The total value of \$1,041,791 assumes any changes in principal value, the reinvestment of dividends, interest and capital gains, but does not reflect the effect of any custodial fees. This chart does not imply any future performance.

Total Return Annualized Performance (%) as of September 30, 2018 Net of Fees

*Performance is for a partial year ending September 30, 2018.

**In July of 2018, it was noted that incorrect benchmark returns were reported. As a result, the benchmark statistics in the above table have been updated.

N/A¹ – The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2008 and 2009 due to less than 36 months of composite and benchmark data.

N/A² – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

N/A³ – The information is not provided due to it being a partial year.

Strategic Value Composite: The objective of this investment strategy is capital appreciation with some income generation. To achieve this goal, equity and fixed income holdings may be in fewer, more concentrated positions compared to other Corbyn account types. This account strategy may also experience a higher rate of turnover and we may invest a portion of the account in “event-driven” equity or fixed-income securities such as workouts and special situations. This composite is compared against 70% Russell 3000 Value / 20% ICE BAML 1-3yr BB Cash Pay / 10% ICE BAML 3-month T-Bill (rebalanced monthly). The Strategic Value composite was created July 2016.

Corbyn Investment Management, Inc. (“Corbyn”) is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Adviser Act of 1940. The firm’s full list of composite descriptions is available upon request.

Corbyn claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Corbyn has not been independently verified.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite and benchmark performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Past performance is not indicative of future results.

The U.S Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include reinvestment of all income. Net of fee returns are reduced by trading costs and the portfolio’s actual investment management fee. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The investment management fee schedule for the composite is tiered at: first \$1mil 1.00%, next \$2mil 0.70%, and greater than \$3mil 0.50%. Actual investment fees incurred by clients are negotiable and may vary.
