

## STRATEGIC INCOME ESG

## INVESTMENT MANAGER

Corbyn Investment Management, Inc. Corbyn has provided separate account investment management services since 1973. Over the years, our mission has remained constant: Earn clients' trust and respect by providing them with outstanding service while seeking strong, consistent investment results.

## GOAL

The principal objective of this investment strategy is total return, primarily resulting from current income, while focusing on investments with a favorable Environmental, Social, and Governance (ESG) profile. To accomplish this objective, we employ a flexible strategy that incorporates material ESG considerations into security selection. Investments are primarily in below investment grade (high yield) fixed income securities, but may also include convertible bonds and preferred stocks. The expected duration of the fixed income securities purchased in this strategy is relatively short so the total returns are less dependent upon general market and interest rate moves.

## PORTFOLIO CHARACTERISTICS\*

ESG investing carries the risk that, under certain market conditions, these investments may underperform other investments that do not utilize ESG criteria. The application of ESG criteria may affect the exposure to certain sectors or types of investments, and may impact the relative investment performance depending on whether such sectors or investments are in or out of favor in the market. The performance of an ESG investment and/or our assessment of such performance may change over time, and our ability to sell securities may be impacted by market conditions and other factors, which could cause us to temporarily hold securities that do not comply with the ESG criteria. In evaluating an investment, we are dependent upon information and data that provide us with a guide to key areas of ESG risk and allow us to independently focus on further research into those areas, but this information and data may be incomplete, inaccurate or unavailable, which could adversely affect the analysis of the ESG factors relevant to a particular investment. Individual investment ESG factors and criteria may change over time and may not be achieved during the investment timeframe. Performance data quoted represents past performance. Past performance does not guarantee future results. Current performance may be higher or lower than performance quoted. Please review the firm's ADV before investing. Investments in lower-rated and non-rated fixed income securities present a greater risk of loss to principal than higher-rated fixed income securities. All performance data reflects the reinvestment of interest and dividends, where applicable, and is net of management fees, trading costs and based on time-weighted return. Multi-year periods are calculated by linking the annual rates of return within such periods. The performance shown is calculated each quarter by including Corbyn-managed accounts employing the stated objective and included in the composite at quarter end. A new account or an account that changes strategy is included in the composite at the beginning of the third full month under management. Any account considered non-discretionary is excluded from the composite. All investments involve risk and principal loss is possible. Bloomberg Short-term Corporate Index is an index constructed of US corporate IG bonds, with a maturity 0-1. It is a subset of the Bloomberg US Corporate Bond Index, which measures the investment grade, fixed-rate, taxable corporate bond market. The Bloomberg US Aggregate Bond Index is a benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market and includes Treasuries, government-related and corporate securities, MBS, ABS, and CMBS. ICE BofA 1-3 Year BB US Cash Pay High Yield Index is a subset of ICE BofA US Cash Pay High Yield Index including all securities with a remaining term to final maturity less than 3 years and rated BB1 through BB3, inclusive. Index returns reflect the reinvestment of dividends and capital gains, if any, but do not reflect brokerage commissions or other expenses of investing. It is not possible to invest directly in an index. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg"). **SNAPSHOT**

Corbyn's ESG strategy is focused on minimizing environmental, social, and governance related risk through an integrated combination of fundamental credit analysis and ESG data. Portfolio construction is driven by in-depth bottoms-up analysis of individual issuers, designed to identify and invest with ESG leaders in their respective industries. We focus on businesses and management teams with a strong track record and a commitment to sustainable business practices, limiting environmental impacts and maintaining strong social and corporate governance policies. We also seek to invest in low impact industries, where ESG related risks are minimal and well controlled.

The US High Yield corporate bond market has seen an increased focus on ESG, with limited issuance of various labeled bonds. We continue to focus on the profile of the entire issuing entity rather than on labels of specific issues. Our belief is that a holistic market focus will provide advantageous access to capital for businesses exhibiting limited ESG related risk profiles.

**Growth of \$500,000**

This chart illustrates the performance of a hypothetical \$500,000 investment in a Strategic Income ESG account since 3/31/2020, net of Corbyn management fees and based on a time weighted rate of return. The total value includes any changes in principal and reinvestment of any dividends, interest and capital gains, but does not reflect the effect of any custodial fees. This chart does not imply any future performance.

**Total Return Annualized Performance (%) as of March 31, 2022 Net of Fees**

N/A<sup>2</sup> – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

**Strategic Income ESG Composite:** *The principal objective of this investment strategy is total return, primarily resulting from current income, while focusing on investments with a favorable Environmental, Social, and Governance (ESG) profile. To accomplish this objective, we employ a flexible strategy that incorporates material ESG considerations into security selection. Investments are primarily in below investment grade (high yield) fixed income securities, but may also include convertible bonds and preferred stocks. The expected duration of the fixed income securities purchased in this strategy is relatively short so the total returns are less dependent upon general market and interest rate moves. Fixed income securities are subject to interest rate risk that could influence the value of investments. This composite is compared against the Bloomberg Short-Term Corporate Index. Prior to January 1, 2022, the composite was compared against the Bloomberg US High Yield 1-3 Ba Total Return Index. The Strategic Income ESG composite was created January 2020 and incepted January 2020.*

Corbyn Investment Management, Inc. (“Corbyn”) is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Adviser Act of 1940. The firm’s full list of composite and broad distribution pooled funds is available upon request.

Corbyn claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Corbyn has been independently verified for the periods January 1, 2008 through June 30, 2021. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm’s policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite and benchmark performance are presented net of foreign withholding taxes on dividends, interest income, and capital gains. Past performance is not indicative of future results.

The U.S Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include reinvestment of all income. Net of fee returns are reduced by trading costs and the portfolio’s actual investment management fee. Composite dispersion is measured by the asset-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing portfolios, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule for the composite is tiered at: first \$1mil 1.00%, next \$2mil 0.70%, and greater than \$3mil 0.50%. Actual investment fees incurred by clients are negotiable and may vary.

**Benchmark:**

**Bloomberg Short-Term Corporate Index** – This is an index constructed of US corporate IG bonds, with a maturity 0-1. It is a subset of the Bloomberg US Corporate Bond Index, which measures the investment grade, fixed-rate, taxable corporate bond market.
